

9" T-Rex Metal Cutting Saw

**EFFORTLESSLY CUTS
ARMOR PLATING,
BORON STEEL,
TITANIUM, STAINLESS
STEEL, WINDSHIELDS
AND MUCH MORE!**

Recommended for vehicle extrication.

P/N	Watts	Volts	Dimensions	Blade	Max. Cutting Depth	Arbor	Weight
T-REX9	1800	120	13.4"X13.4"X18.4"	9"	3 1/8"	1"	21 lbs.

A Must For Every Fire Engine!

This advancement in engineering features a 3.25" metal cutting depth and a bevel angle up to 45°. This amazing innovation leaves cuts cool to the touch while collecting all burrs and shards in the side of the case. This advanced tool comes also with one mild steel saw blade, one carrying/storage case, all tools needed for blade replacement and maintenance. Comes with built in LED light.

9" T-Rex Saw Blades

Mild Steel Blade

P/N: UF-BL09

Cuts most mild steel as easily as cutting plywood.

Aluminum Blade

P/N: UF-BLALM9

Used for a wide variety of aluminum cutting. Provides superior life and is resistant to loading.

Stainless Steel Blade

P/N: UF-BLSS9

Used for cutting stainless steel, boron, titanium, impact bars and panels.

**#1 Blade
Choice**

Features

- Cuts steel as easily as cutting plywood
- Cuts most building materials effortlessly
- Worm gear drive
- LED lighted power & laser switches
- Specially designed cover collects chips & sparks
- Five times faster and cleaner than other saws
- Spindle lock for fast, easy blade changes
- Retractable blade guard for extra safety
- Laser cutting guide
- Powerful double-insulated motor for continuous loads
- Soft-start
- Well balanced handle design for better control
