Univent Pro-Saws are built from the ground up to withstand the most extreme conditions. Univent Pro-Saws feature an air injected engine; pure-foam air cleaner; high-performance, all-position carburetor; stainless-steel muffler-guard plate; solid bar with replaceable tip; Molybdenum impregnated pistons, rings and cylinders; as well as Carbide Chain of America chains. The chain and bar have been specially designed for a more secure connection to significantly diminish side-to-side chain motion and anti-kickback features, standard, to create a much safer cutting tool.
